

# MINE-X®

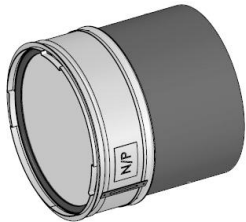

On Road DPF & DOC Replacements

DCL International Inc. manufactures diesel oxidation catalyst (DOC) and diesel particulate filter (DPF) replacement modules for on-road trucks model years '07 – 2010.

Cummins DOC

Volvo/Mack DPF

Detroit Diesel DPF

Having a fully integrated manufacturing process allows DCL to test, develop and manufacture high quality emissions treatment solutions for the aftermarket.

- All DCL parts are brand new (not reconditioned)
- Built as direct replacements of OEM parts for easy installation
- Tested to produce the same emission reductions and produce the same backpressure as the original units
- Can be cleaned in the same manner as the OEM part

## The Metallic DOC Difference

Problems with physical damage to the DOC? DCL DOCs are built to survive using coiled metal compared to the ceramic bricks provided by the OEMs.

## Supported Brands

- Caterpillar
- Cummins
- Detroit Diesel
- Freightliner
- Fuso
- Hino
- International
- Kenworth
- Mack
- Mitsubishi
